The company has a single Active Directory Domain Services domain. As part of the Office 365 deployment, the company is preparing to deploy Office Telemetry. You need to disguise file names and document titles, while still collecting the telemetry data. What should you do? A. In the Telemetry Dashboard, display only files that are used by multiple users.B. On each client computer, edit the registry to prevent telemetry logging.C. In the Telemetry Dashboard, obfuscate the document name, title, and path.D. In the Telemetry Dashboard, apply a label named Private to employees. Answer: C QUESTION 2Hotspot QuestionA company has an on-premises deployment of Microsoft Exchange Server 2010 with Service Pack 3. The company is migrating to Office 365. During the migration, users must be able to see availability information between the on- premises deployment and Office 365. You need to identify the appropriate mailbox migration strategy to use. Which migration strategies are supported for this scenario? To answer, drag the appropriate answer choices to the correct targets. Each answer choice may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

| Migration Strategy    | Supported                             |
|-----------------------|---------------------------------------|
| Cutover migration     | <input type="checkbox"/><br>Yes<br>No |
| Staged migration      | <input type="checkbox"/><br>Yes<br>No |
| Remote move migration | <input type="checkbox"/><br>Yes<br>No |
| IMAP migration        | <input type="checkbox"/><br>Yes<br>No |

Answer:

| Migration Strategy    | Supported   |
|-----------------------|---|
| Cutover migration     | <input type="checkbox"/><br>Yes<br><input checked="" type="checkbox"/> No |
| Staged migration      | <input type="checkbox"/><br>Yes<br><input checked="" type="checkbox"/> No |
| Remote move migration | <input checked="" type="checkbox"/><br>Yes<br>No                          |
| IMAP migration        | <input type="checkbox"/><br>Yes<br><input checked="" type="checkbox"/> No |

QUESTION 3Drag and Drop QuestionYou are the Office 365 administrator for your company. Employees share documents with

internal and external users on Microsoft SharePoint Online sites. User1 inadvertently shares a link to Document1 with an external user named Customer1. You need to remove access to Document1 from Customer1. Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

|  | Answer Area  |
|--|--|
| In the properties window, click <b>Withdraw</b> .                          | Open the SharePoint library that contains the shared document.             |
| Display the Site Settings page.  | Display the Site Settings page.  |
| Click <b>Access requests and invitations</b> .                             | Click <b>Access requests and invitations</b> .                             |
| Point to Customer1, and then click the associated <b>Open Menu</b> button. | Point to Customer1, and then click the associated <b>Open Menu</b> button. |
| Remove the SharePoint Online license from Customer1.                       |  |
| Open the SharePoint library that contains the shared document.             | In the properties window, click <b>Withdraw</b> .                          |

QUESTION 4You are the Office 365 administrator for your company. The company's environment includes Office 2007, Office 2010, Office 2013, Windows 7, and Windows 8. The company uses Office Telemetry. You need to collect Office version usage data for an upcoming migration to Office 365 ProPlus. What should you do? A. Open documents by using Office 2007, Office 2010, or Office 2013 on client computers that run Windows 7.B. Use the Get-MsolUsercmdlet with the ServiceStatus parameter.C. Search network shares for Office documents and export the results to a . log file.D. Search local computers for Office documents and export the results to a . csv file. Answer: A QUESTION 5Hotspot QuestionYou are the Office 365 administrator for your company. A user wants to share a link to a presentation with a salesperson. The salesperson will share the link with potential customers. You have the following requirements:- Make a read-only version of the presentation available to anonymous users.- Notify the salesperson by email when the presentation is available.You need to configure the sharing settings. How should you configure the sharing settings? To answer, configure the appropriate options in the dialog box in the answer area

Answer Area

Share 'Presentation1'

Shared with lots of people

Invite people

Enter names, email addresses, or 'Everyone'.

Include a personal message with this invitation

☒ Require sign-in

QUESTION 6Drag and Drop QuestionYour company uses Microsoft SharePoint Online. You create a subsite in an existing site collection. The subsite will serve as a document repository from which anyone can download documents. External sharing is turned off globally. You plan to share documents with users by emailing document links. Users must not be required to sign in to the subsite to download the documents. You need to configure the environment to allow document sharing with external users. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer Area

Enable sharing for each document.

Share the site collection.

Share the subsite.

Configure the tenant settings to allow external sharing.

Configure the site collection properties to allow external sharing.

Block inherited permissions for the subsite.

Create a new public website.

QUESTION 8You are the Office 365 administrator for your company. The company uses Microsoft Exchange Online and Microsoft Lync Online. An employee named User1 has the user name, email address, and Lync address User1@contoso.com. The employee requests that you change only his Lync address to User1- Sales@contoso.com. You start a Windows PowerShell session and run the following commands, providing your admin account credentials when prompted. You need to complete the process of updating the employee's Lync address without affecting any other addresses. Which Windows PowerShell command should you run next?

```
$cred = Get-Credential
$session = New-PSession -ConfigurationName Microsoft.Exchange -ConnectionUri https://ps.outlook.com/powershell/
-Credential $cred -Authentication Basic -AllowRedirection
Import-PSession $session
$session = New-CsOnlineSession -Credential $cred
Import-PSession $session
$ID = User1@contoso.com
$OldAddress = SIP:User1@contoso.com
$NewAddress = SIP:User1-Sales@contoso.com
```

- A. Set-MsolUser -UserPrincipalName \$ID -ProxyAddresses@{add = "\$NewAddress"; remove = "\$OldAddress"}>B. Set-Mailbox -Identity \$ID -EmailAddresses@{add = "\$NewAddress"; remove = "\$Old Address"}C. Set-Mailbox -Identity \$ID -WindowsEmailAddress \$NewAddressD. Set-CsUser -Identity \$ID -ProxyAddresses@{add = M\$NewAddress"; remove="\$OldAddress"}> Answer: B

QUESTION 9Your company uses Microsoft Exchange Online and Microsoft Lync Online. You are planning the compliance strategy for electronic correspondence. You need to archive Lync communications for mailboxes that are placed on an in-place hold. Which two forms of Lync communications should you archive? Each correct answer presents part of the solution. A. Multiparty instant messagesB. Peer-to-peer file transfersC. Audio and video for peer-to-peer conferencesD. Whiteboards and polls shared during conferencesE. Desktop sharing sessions Answer: AD

QUESTION 10Drag and Drop QuestionYour company has an Office 365 subscription and uses Microsoft Exchange Online. You are creating several Exchange objects to meet different requirements. You need to ascertain the correct recipient type for each object based on the description. Which recipient type best matches each description? To answer, drag the appropriate recipient types to the correct targets. Each recipient type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Answer Area

Mail contact

Mail user

Shared mailbox

Distribution list

| Recipient description  | Recipient type |
|--|----------------|
| An external user who will not require access to the Office 365 portal. The GAL must display the user's external email address. |                |
| An external user who will require access to the Office 365 portal. The GAL must display the user's external email address.     |                |
| Any department member must be able to open the mailbox and reply to email messages. The GAL must display this recipient.       |                |
| Email messages sent to this recipient must be sent to every department member. The GAL must display this recipient.            |                |

QUESTION 12Drag and Drop QuestionYour company uses Microsoft Exchange Online. End users access their mailboxes by using Outlook Web App (OWA). The company is deploying an end-user request process for new shared mailboxes. When a user requests a shared mailbox, a corresponding group must also be created. The requestor will manage the group membership in OWA to allow other users access I the shared mailbox. You are creating a Windows PowerShell script to meet the following requirements:- Create

a shared mailbox that has the requested display name and email address.- Create a group and make the requestor both the owner and a member of the group.- Assign full control for the shared mailbox to the group.The script currently includes the following Windows PowerShell script segment

```
param (
    [string]$requestorUPN = $(throw "-requestorUPN is required."),
    [string]$displayName = $(throw "-displayName is required."),
    [string]$alias = $(throw "-alias is required."),
    [string]$domain = $(throw "-domain is required.")
)

$SmbName = $alias + "@" + $domain
$GroupDisplayname = $displayName + "-Group"
$GroupAlias = $alias + "-group"
$GroupName = $GroupAlias + $domain
```

You need to complete the Windows PowerShell script. How should you complete the script? To answer, drag the appropriate cmdlets to the correct targets. Each cmdlet may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

**QUESTION 14**Your company subscribes to an Office 365 Plan E3. A user named User1 installs Office Professional Plus for Office 365 on a client computer. From the Microsoft Online Services portal, you assign User1 an Office Professional Plus license. One month after installing Office, User1 can no longer save and edit Office documents on the client computer. User1 can open and view Office documents. You need to ensure that User1 can save and edit documents on the client computer by using office. What should you do? A. Install the Office Customization Tool.B. Reinstall Office Professional Plus.C. Install the Microsoft Online Services Sign-in Assistant.D. Upgrade the subscription to Plan E4. Answer: C

**QUESTION 15**Your company has a hybrid deployment of Office 365. You need to identify which certificate is used for token signing between the on-premises environment and Office 365. Which tool should you use? A. the Exchange Management ConsoleB. the AD FS 2.0 Management consoleC. the Active Directory Domains and Trusts snap-inD. the Office 365 portal E. the Certificates snap-in Answer: B

**QUESTION 16**Your company has an Office 365 subscription. A user named Test5 has a mailbox. You need to ensure that all of the email messages sent and received by Test5 are accessible to members of the audit department for 60 days, even if Test5 permanently deletes the messages. What should you do? A. Run the Set-User cmdlet.B. Run the Set-Mailbox cmdlet.C. Run the Set-RetentionPolicyTag cmdlet.D. Run the Set-MailboxDatabase cmdlet.E. Run the Set-RetentionPolicy cmdlet. Answer: B

**QUESTION 17**You deploy Office 365. All the members of a team named Sales have full access to a shared mailbox named Sales. You enable auditing for all shared mailboxes. From the Sales mailbox, an email message that contains inappropriate content is sent. You need to identify which user sent the message. What should you do? A. From the Exchange Control Panel, run an administrator role group report.B. From Windows PowerShell, run the Get-SharingPolicy cmdlet.C. From Windows PowerShell, run the Write-AdminAuditLog cmdlet.D. From Windows PowerShell, run the New-MailboxAuditLogSearch cmdlet. Answer: D

**QUESTION 18**Your company deploys Microsoft Lync Online. You deploy the Microsoft Lync 2010 client to all client computers. All users log on to the local domain. You need to prevent users from modifying the Advanced Connection Settings on the Lync 2010 client. What should you do? A. Deploy a Group Policy object (GPO) that uses the Communicator.adm administrative template.B. Deploy a Group Policy object (GPO) that removes all of the members of the local Administrators group.C. From the Lync Server Management Shell, run the Set-CsClientPolicy cmdlet.D. From the Lync Server Management Shell, run the Set-CsUserServicesConfiguration cmdlet. Answer: A

**QUESTION 19**Drag and Drop QuestionYou are the Office 365 administrator for your company. User1 has shared a link to edit a document with an external user. The shared document must not be modified. You need to update the sharing permissions so that the external user can display, but not modify, the document. In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Question 4 of 5 (Exam A)

Mark

Your company hires a new human resources consultant. Corporate policy specifies the following requirements for consultants:

- Consultants must supply their own laptops.
- The company must supply an Office 365 cloud account.
- Consultants may have access only to Microsoft Exchange Online, Microsoft SharePoint, and Microsoft Teams.

In the Office 365 admin center, you create an account for the consultant and assign an E3 license to her. You send instructions to the consultant for installing Office 365 ProPlus on her laptop. The consultant signs in to the Office 365 portal and changes her password when prompted to do so. She successfully accesses her email by using Outlook Web App (OWA). She attempts to install Office 365 ProPlus, but is unable to do so. The Software page of the Office 365 admin center displays the following error message:

You need to ensure that the consultant can install Office 365 ProPlus. What should you do?

Office 365

A company is upgrading from Office 2010 to Office 365 ProPlus. The company plans to use the Telemetry Dashboard to identify document compatibility issues. You need to enable telemetry and immediately trigger data collection. Which two actions should you perform? Each correct answer presents part of the solution.

- ☐ A. Modify the AgentInitWait and AgentRandomDelay registry values on the client computers.
- ☐ B. Configure a Group Policy Object to turn on telemetry data collection in the User Configuration settings.
- ☐ C. Configure a Group Policy Object to turn on telemetry data collection in the Computer Configuration settings.
- ☐ D. Delete the contents of the telemetry shared folder.
- ☐ E. Run the gpupdate.exe /force command on the server that hosts the Group Policy objects.
